

Create your own culinary scenes with the 3D Models Pack of Fruits, Vegetables, Proteins, Cheeses and Kitchen Utensils!

This pack includes 96 low-poly prefabs with their respective materials, representing a wide variety of food and kitchen utensils. Fruits and vegetables are available in full and parts, giving you multiple usage options.

Features:

- 96 prefabs of fruits, vegetables, proteins, cheeses and kitchen utensils
- Low-poly models for optimal performance
- Fruits and vegetables available in full and parts

Usage:

- Cooking and restaurant games
- Kitchen simulators
- Educational and demonstration applications
- Virtual and augmented reality

Examples:

- Create a realistic kitchen scene for your cooking game.
- Simulate the preparation of a favorite dish in your kitchen simulator.
- Teach children about food with an educational application.
- Create a virtual or augmented reality game where players can cook their own dishes.

Download the pack today and start creating your own culinary scenes!
